## **DETAILED ACTION**

### ***Election/Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18 and 27, drawn to adenovirus vectors with chimeric fiber protein and methods of DNA transfer using same, classified in class 435, subclass 320.1 or class 424, subclass 93.2.
- II. Claims 19-23 and 27, drawn to non-adenoviral gene transfer vectors comprising an adenoviral fiber protein and methods of DNA transfer using same, classified in class 435, subclass 320.1; class 424, subclasses 93.2 and 450; and class 514, subclass 44.
- III. Claims 24-27, drawn to Ad3 adenoviral vector and methods of DNA transfer using same, classified in class 435, subclass 320.1 and class 424, subclass 93.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, as claimed, each mutually excludes each of the other inventions. Inventions I and III are adenovirus vectors, but in invention I the fiber protein is chimeric and the vector can be based on any adenovirus, whereas invention III is restricted to Ad3 and its own, non-chimeric fiber

Art Unit: 1632

protein. Invention II is explicitly drawn to non-adenoviral vectors, which could include other viral vectors, plasmids, liposomes, lysine conjugates, etc.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the search required for each group is not required for each of the other groups, restriction for examination purposes as indicated is proper.

Claim 27 link(s) inventions I, II and III. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claim 27. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Art Unit: 1632

Applicant is reminded that Invention I was elected, examined and finally rejected in application 08/852,924, which final rejection was affirmed by the Board of Patent Appeals and Interferences. Consequently, linking claim 27 is not allowable.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
